Versatility at home

Multi Folding Doors

**Multi Folding
Doors**

Outstanding performance and flexibility

Rehau Total70 multi folding doors offer a wide range of styles and combinations. The flexibility of the system means that the doors can open from either left, right or centre to give maximum versatility.

Integration and innovation

Product development is ongoing at GRM and that is why we use the CiiLOCK system in the manufacturing process. Standard hinge placement on multi fold doors are usually face mounted which are exposed to the elements. The new CiiLOCK hinges are partially concealed offering better weather proofing and increased security. Another major benefit of these improvements is the ability to fabricate multi fold door sashes up to a metre wide. This means reducing the number of sashes that are required, leading to uninterrupted and more open views, unlike other PVCu multi fold doors offering standard 900mm sashes.

Versatility and choice

The multi folding doors are available in 20 plus foil laminate colours. The choice of colours doesn't stop there. GRM have a fully accredited spraying and coating facility, utilizing AVKO specialist paint products. This spraying option means the doors can be finished in an infinite variety of colours to suit the end user, all covered with our 10 year warranty.
